Accuracy of chemical analysis in clinical laboratories, 853
Adenosis of breast, 823
Aerobacter aerogenes, meningitis from, 534
Agnogenic myeloid metaplasia of spleen, 449
Air embolism occurring during mastectomy, 322
Ampulla of Vater, leiomyosarcoma of, 827
Anemias, hemolytic, 637
Anthrax
meningitis, 719
penicillin and antiserum in, 151
Anti-Rh serum, substance which inhibits, 646
Antigen
cardiolipin lecithin, 874
common group, among *Candida albicans*, *Saccharomyces cerevisiae* and *Hansenula anomala*, 807
Antigens, immunologic reactions in trichinosis with purified, 29
Antiserum in anthrax, 151
Antiserums, survey of commercial Rh, 462
Antithrombin
following Dicumarol, 712
in patients with thrombosing tendencies, 709
Assay of bactericidal and bacteriostatic agents, 93
Autopsy, obtaining permission for, 834
Bactericidal and bacteriostatic agents, assay of, 93
Bacteriologic study of 150 cases of genitourinary infection, 479

Bacteriology
Aerobacter aerogenes, meningitis caused by, 534
antigen, common group, among *Candida albicans*, *Saccharomyces cerevisiae* and *Hansenula anomala*, 807
arsenicals, assay of, 93
assay
of arsenicals, penicillin, streptomycin, 93
of bactericidal and bacteriostatic agents, 93
blood agar base for neisseriae, pneumococci and streptococci, 281
C. diphtheriae, Mueller's medium for culture of, 44
Candida albicans in hospital population, serum agglutinins for, 813
Corynebacterium pyogenes in man, 209
Friedländer's bacillus, meningitis caused by, 534
meningitis from Friedländer's bacillus or *Aerobacter aerogenes*, 534
Mueller's medium for culture of *C. diphtheriae*, 44
neisseriae, blood agar base for, 281
papain in cultivation of bacteria from blood, 365
penicillin, assay of, 93
pneumococci, blood agar base for, 281
Saccharomyces cerevisiae in hospital population, serum agglutinins for, 813
Salmonella and Shigella, selection of, for serologic classification, 1
salmonellae, selective medium for isolation from stools, 13
Shigella, isolation from gallbladder of carrier, 290
streptococci, blood agar base for, 281
streptomycin, assay of, 93
Biochemistry
accelerated reaction in prothrombin time of diluted plasma, 704
antithrombin and prothrombin following Dicumarol, 712
in patients with thrombosing tendencies, 709
chemical analyses, survey of accuracy in clinical laboratories, 853
Dicumarol, prothrombin and antithrombin, following, 712
fasting, changes in blood and body fluids in, 169
heparin tolerance principle, detection of intravascular clotting tendency by, 862
intravascular clotting tendency, detection by heparin tolerance principle, 862
liver function tests in infectious mononucleosis, 529
mucopolysaccharide content of skin in myxedema, 507
myxedema, mucopolysaccharide content of skin, 507
nesslerization technic and its effect on serum protein values, 650
plasma, diluted, accelerated reaction of prothrombin time of, 704
prothrombin
and antithrombin following Dicumarol, 712
and antithrombin in patients with thrombosing tendencies, 709
test, clinical observations on, 471
time of diluted plasma, accelerated reaction in, 704
serum electrolytes, 169
serum phosphatase and other liver function tests in infectious mononucleosis, 529
serum protein values, effect of nesslerization technic on, 650
serum proteins, evaluation of methods for, 847
survey of accuracy of chemical analyses in clinical laboratories, 853
urobilinogen studies, 108
visceral angiitis, urinary findings in, 820
Blood
agar base for neisseriae, pneumococci and streptococci, 281
culture, papain in, 365
transfusions, sensitization to, by Hr factor, 643
Bone marrow
erythroid multiple myeloma, 222
intraosseous infusions in infants, 143
osteoid replacement of, 216
technics used in study of aspirated sternal marrow, 631
